PROFILE

As a software engineering student with a background as a combat medic in the army, I bring a unique perspective to the tech industry. I am passionate about leveraging my skills and experiences to develop innovative solutions and contribute to the success of a high-tech company. With a strong foundation in software engineering principles and experience working in high-stress environments, I am confident in my ability to adapt to new challenges and excel in a fast-paced, dynamic workplace.

EXPERIENCE

2023

LOWER E-COMMERCE WEBSITE:

- Designed and developed an e-commerce website for a flower shop using React and bootstrap.
- Implemented a clean and modern design using responsive design principles and optimized page load times for a better user experience.

2023

WEB DEVELOPMENT::

- Designed and developed a website using React
- Implemented various features such as user authentication, dynamic server statistics, and server news updates.
- Used a modern and intuitive design to make the website user-friendly and engaging.

2023

LEGO WEB DEVELOPMENT:

- Designed and developed a web page for selling Lego sets using JavaScript, HTML, and CSS.
